DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Joseph W. Ragusa on March 4, 2010.

The application has been amended as follows:

In the **claim**:

- a) In claim 14, line 2, after "a substrate contact;" deleted [and].
- b) In claim 16, line 2, after "claim" deleted [16] and inserted -14--.

REASONS FOR ALLOWANCE

3. Claims 14, 16, 18 and 21 – 36 are allowed.

4. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or suggest, either singularly or in combination, at least a limitation of an article of manufacture comprising: a substrate having a substrate contacts; an optoelectronic component having a central light exit

Art Unit: 2815

and/or entry and an edge contact disposed at least partially around a periphery of the light exit; an insulating layer partially arranged on the substrate and the optoelectronic component; and a conducting structure arranged on the insulating layer so as to contact the edge contact and the substrate contact, wherein a window is opened in the insulating layer in the area of the central light exit and/or entry of the optoelectronic component (claim 14) and wherein the conducting structure at least partially covers the light exit and/or entry of the optoelectronic component, the conducting structure being reflective so as to guide light (claim 28). Yamamoto et al. (U. S. Pat. No. 6,404,792) teaches an article of manufacture comprising: a substrate having a substrate contacts; an optoelectronic component having a central light exit and/or entry and an edge contact disposed at least partially around a periphery of the light exit; and a conducting structure arranged on the optoelectronic component and the substrate so as to contact the edge contact and the substrate contact. However, Yamamoto et al. does not teach an insulating layer partially arranged on the substrate and the optoelectronic component; and a conducting structure arranged on the insulating layer so as to contact the edge contact and the substrate contact, wherein a window is opened in the insulating layer in the area of the central light exit and/or entry of the optoelectronic component as set forth in claim 14 and wherein the conducting structure at least partially covers the light exit and/or entry of the optoelectronic component, the conducting structure being reflective so as to guide light as set forth in claim 28.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2815

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
